“Look up at the stars and not down at your feet. Try to make sense of what you see, and wonder about what makes the universe exist. Be curious.”
The idea of celestial objects affecting life on earth has absorbed mankind for thousands of years. In ancient Asia, the movement of the stars across the night sky was regarded as divine omens about the future. Later, Greek philosophers lay the groundwork for the astrology we know today, which divides the year into 12 periods of 12 different signs of the zodiac.

The new Signs of the Zodiac collection is inspired by the sky and the stars. Explore the possibilities and mix your own unique piece of jewellery that matches your style and accentuates your personality.

The collection will be expanded with new star stones, allowing you to add new life and meaning to your zodiac sign jewellery.

Please note: With regards to the placement of the zodiac signs in relation to date, we have selected one of several models. No matter which model you use, you can of course find the zodiac sign jewellery that fits you.
